

Professional Doctorate in Education (EdD programme) with the University of Brighton

Overview

The Mauritius Institute of Education, in collaboration with the University of Brighton is presently offering a Doctorate in Education (EdD). This innovative EdD programme is intended for experienced, practising education professionals. It supports an individual's development as a researching practitioner with a critical and interrogative approach to the understanding of their educational practice. Students on the programme represent a range of formal and informal educational settings in schools, youth work, further and higher education, and other organisations with a focus on education.

Aims of the Programme

The aim of the EdD is to deliver a programme of research based professional development to experienced professional practitioners who have educational responsibilities within their employment. To do this, the programme will develop conceptual knowledge and research capacity that will enable students to:

- Develop the capability of challenging, in an innovative, substantive and original manner, the adequacy of the existing body of knowledge.
- Develop the capacity to understand, use and critique a broad range of research techniques and approaches through which educational phenomena can be understood and improved, leading to research that makes an original contribution to knowledge, and which is of publishable standard.
- Develop the capability of defining, undertaking and evaluating research on professional practice and policy.
- Undertake critical reflection and lead the continuing development of new thinking and practices in their professional context to make an original contribution to professional knowledge.
- Contribute through coursework and a thesis, to knowledge and practice within their own profession.

Programme structure

Course duration, Part-time: Minimum 5 years and a maximum of 7 years

The EdD comprises **two parts**:

Stage 1 comprising three assessed assignments; and

Stage 2, which is the thesis stage and comprises a research plan and a 50,000 word thesis.

Stage 1 usually takes two years to complete and Stage 2, the research element, a further three years. The assignments and modules in Stage 1, together with a viva voce examination at the end of this Stage form a Master of Research in Education (MRes).

Support in completing the EdD

Within Stage 1, you will be allocated two Advisors/Supervisors with expertise and academic interest in your chosen area of study; one Advisor/Supervisor will be from the University of Brighton and one will be from MIE. Your Advisors/supervisors will support you in completing your three assignments during Stages 1 and in completing your thesis in Stage 2 of the EdD. It is usual for Advisors/Supervisors to offer feedback to students on their work via email as well as through face-to-face (or Skype or other technology) sessions.

Entry requirements

Degree and/or experience:

A qualification, normally at Master's level in a relevant subject or appropriate research experience. An application made by someone with research experience but with no Master's level qualification will be considered on its merits and will normally require independent academic references. Applicants will normally have at least four years of appropriate professional experiences.

Applicants whose predicted grades fall below these requirements, but who can demonstrate a high commitment to the subject discipline or have relevant work experience, are still encouraged to apply and will be considered on an individual basis.

Fees

£2,800 per year

How to apply

- **Your idea**

If you are interested in applying for research study, you need to make sure you read around your subject area of interest so you can write an informed and clear application.

- **Research proposal**

You need to submit a research proposal alongside your application. Within this you should take the opportunity to clearly outline your research idea; your research methodology and critical approaches; experience; and original contribution to knowledge and key themes, concepts and ideas. Download guidance on how to write a research proposal on

<https://www.brighton.ac.uk/pdf/research/edd-guidelines-for-research-proposal.pdf>

- **Application**

You may apply online by following the link:

https://evsivr.brighton.ac.uk/urd/sits.urd/run/siw_ipp_lgn.login?process=siw_ipp_app_crs.

Alongside your application we also require you to upload copies of your bachelors and masters certificates and transcripts, your IELTS certificate or equivalent, evidence of your professional experience and two references (one must be academic and both must have been written within the last year).
